

Dear Parents

Greetings from The Mann School!

We feel happy to share with you that The Mann School has taken an initiative to 'Say NO to plastic & polybags' on its campus.

Plastic waste have been identified as one of the major source of environmental pollution as they don't decay naturally. Even the food products stored in these polybags, get contaminated.. It's like having a slow poison with intake of every bite. .

Thus, the school has decided to completely ban the polybags less than 50 microns on the campus. They can be replaced either with jute bags or cloth bags as they are safe.

A little help that we can do today to ourselves will provide a healthy environment to the next generations to breathe in for decades.

This effort will make a beginning to end the problem which is grave to life and nature.

In hope of your support

Regards

Cdr. V.K. Banga
